

45-Degree Elbow Pipe Fitting

This is a 45-degree elbow fitting. It is used to change the direction of a pipe or tube run by 45 degrees.

Product Overview

45-Degree Stainless Steel Elbow

This 45-degree elbow pipe fitting is engineered for seamless directional changes in piping and fluid handling systems. Designed for welding applications, it features smooth, beveled edges that ensure a secure and durable connection. Constructed from high-quality stainless steel, this fitting is built to withstand demanding industrial environments.

Technical Specifications

Material Grade	304L Stainless Steel
Angle	45 degrees
Nominal Pipe Size	1.5 inch
Schedule	10S
Part ID	63775

Key Features

Connection Type

Weld-on • Beveled Edge

Common Applications

- Plumbing systems
- Industrial piping
- Fluid handling
