

45-Degree PVC Elbow Fitting for Plumbing and Drainage

This 45-degree PVC elbow fitting is designed for plumbing and drainage applications. Its durable PVC construction provides a smooth inner surface for efficient flow and resists corrosion and chemical degradation.

Product Overview

Versatile Flow Solutions

This 45-degree PVC elbow fitting is engineered for reliable performance in plumbing and drainage systems. Crafted from high-grade PVC, it offers superior resistance to chemical degradation and corrosion while maintaining a smooth interior for efficient fluid transport. It is specifically designed for secure solvent welding, facilitating leak-proof directional changes in diverse residential, commercial, and industrial environments.

Technical Specifications

Angle	45 degree
Material	PVC
Connection Method	Solvent welding

Compliance and Usage

Primary Applications	Plumbing, Drainage, Water Supply, Irrigation, Waste Disposal
Industry Standard Compliance	Yes
