

4.5 Inch Abrasive Grinding Wheel for Metal

This 4.5 inch grinding wheel is designed for metalworking. It features a high-performance abrasive for efficient and durable grinding.

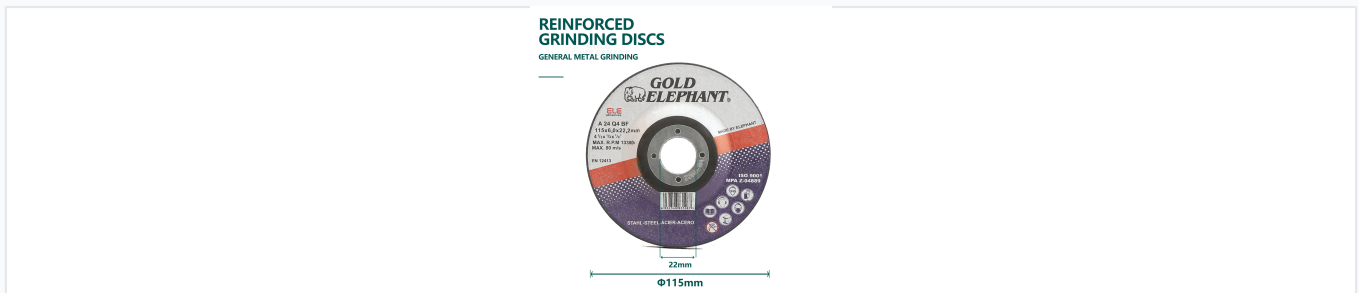

Overview

High-Performance Abrasive Grinding Disc

This 4.5-inch grinding disc is engineered for heavy-duty metal grinding applications. Constructed with high-performance abrasive materials, it offers durability and consistent removal rates across various steel and metal surfaces. The design complies with international safety standards, ensuring reliability for professional industrial use.

Technical Specifications

Reinforced grinding disc featuring A 24 Q4 BF abrasive grade, designed for general metal grinding applications.

Dimensions

115 mm
Diameter

6 mm
Thickness

22.2 mm
Bore Diameter

Performance Ratings

13300 RPM
Max RPM

80 m/s
Max Speed

Abrasive Grade

A 24 Q4 BF

Compatibility

Suitable Materials

Steel, Stahl, Acier, Acero

Compliance & Safety

Certifications

ISO 9001 • MPA Z-04889 • EN 12413
