Product Overview

Professional Diamond Cutting Performance

This 4.5-inch continuous rim diamond blade is engineered for high-precision cutting of ceramic tile, marble, and ceramics. Designed with advanced silencing grooves, the blade offers superior heat dissipation and noise reduction for a more comfortable work environment. Its durable construction ensures a smooth, chip-free cutting surface and an extended service life for demanding professional applications.

Technical Specifications

Blade Diameter	115 mm
Maximum RPM	13000 RPM
Arbor Size	5/8", 20mm, 7/8"

Performance Features

Cutting Capabilities

- Wet cutting
- Dry cutting
- Continuous rim design
- Silencing groove technology

Compatible Materials

Ceramic Tile • Marble • Ceramics • Stone
