Product Overview

Professional Compact Excavator

This 4.5-ton compact excavator is engineered for high-performance digging and material handling in various construction and landscaping environments. It features a high-pressure hydraulic system designed for precision, combined with powerful traction and climbing capabilities to navigate challenging terrains. Its robust build ensures reliability for demanding utility work and heavy-duty tasks.

Performance Metrics

Max Digging Force

32.2 KN

Max Digging Force

Max Traction

43 KN

Max Traction

Hydraulic System

Operation Hydraulic Pressure	23.5 Mpa
Variable displacement pump capacity	20+20+6+2.7 ml/r

Operating Capabilities

Maximum Gradeability	58 %
Travelling Speed	4.2~5.2 km/h
Swing Speed of Platform	10.5~13.5 rpm
