

# 450V AC Motor Run Capacitor with Aluminum Case

This capacitor is designed for AC motor run applications, particularly in air conditioning systems. It features an aluminum case for enhanced durability and heat dissipation.

## ADDITIONAL IMAGES

## Overview

### High-Performance CBB65 Capacitor

The CBB65 series capacitor is engineered for reliable performance in alternating current circuits, featuring a durable metal case design. It offers excellent self-healing properties, high insulation resistance, and integrated anti-explosive safety mechanisms for long-term operational stability. This component is an ideal solution for starting and running single-phase AC motors in demanding environments like refrigeration, air conditioning, and various household appliances.

## Technical Specifications

Rated Voltage	450 V
Operating Frequency	50/60 Hz
Operating Temperature	-40°C to 90°C
Key Features	Self-Healing, High Insulation Resistance, Anti-Explosive Device, Aluminum Case

## Applications

### Suitable Applications

- Single-phase AC Motors
- Air Conditioning Systems
- Refrigerators
- Household Appliances
- Power Supply Units

## Compliance

### Certifications

CE Certified
