

458cc Gasoline Engine for Generators and Water Pumps

The 458cc gasoline engine is designed for power generation and industrial applications. Its robust construction ensures durability and reliability for powering generators, water pumps, and other equipment.

Product Overview

High-Performance 458cc Gasoline Engine

The CBS460F is a robust 458cc gasoline engine engineered for demanding industrial and agricultural applications. Featuring an OHV design, it delivers a powerful 10KW output at 3600RPM, ensuring consistent performance for generators and water pumps. Its durable construction and efficient cooling system make it a reliable choice for heavy-duty machinery.

Technical Specifications

Net Power

10 KW

Net Power

3600 RPM

Rated Speed

Displacement

458 cc

Design Type

OHV (Overhead Valve)

Applications

Suitable Equipment

Power Generators, Water Pumps, Agricultural Machinery, Construction Equipment

Features

Core Features

- Efficient air cooling system
- Easy-start procedure
- Durable construction
- User-friendly controls
- Precise fuel delivery via carburetor
