

458cc OHV Engine

This 458cc OHV engine is designed for various applications. It features efficient combustion for reliable power and extended lifespan.

Overview

High-Efficiency 458cc OHV Engine

This 458cc OHV engine is engineered for reliable, stable power output across various demanding applications. It features a spherical combustion chamber design that optimizes fuel efficiency while reducing emissions. Built with a lightweight piston connecting rod system, the engine operates with minimal vibration, ensuring smoother performance and longevity.

Technical Specifications

Displacement	458 cc
Engine Type	OHV (Overhead Valve)

Key Features

Performance Features

- Spherical combustion chamber
- High combustion efficiency
- Low vibration design
- Stable power output
- Easy start mechanism

Maintenance & Safety

Ventilation System	Fully sealed design to reduce oil temperature and extend service life
Safety Warnings	Check oil before starting, Carbon monoxide hazard, Hot surface warning, Do not operate in enclosed areas
