

458L Beverage Display Cooler

This 458L beverage display cooler is designed for commercial use, offering ample space for storing and showcasing various beverages. It features a transparent glass door for clear visibility, adjustable shelves, and an internal cooling system to maintain optimal temperatures.

Product Overview

Professional Beverage Merchandiser

This 458L beverage display cooler is engineered for high-visibility commercial environments such as supermarkets, convenience stores, and restaurants. It features a robust direct cooling system with adjustable shelving to accommodate various bottle sizes, ensuring optimal product organization. The unit includes a double-layer tempered glass door and interior lighting to maximize product appeal while maintaining consistent temperatures between 0 and 10°C.
