Overview

Compact Ku-Band Satellite Solution

This 45cm wall-mount satellite dish antenna is engineered for reliable Ku-band signal reception in diverse environments. Its compact design and robust construction make it an ideal choice for satellite television and data communication applications where space is limited. The included mounting bracket ensures a stable, secure installation on vertical surfaces, providing consistent performance for moderate signal strength areas.

Technical Specifications

Dish Diameter	45 cm
Frequency Band	Ku-Band
Mounting Type	Wall Mount
Primary Applications	Satellite TV, Data Reception, Satellite Communication

Construction & Durability

Build Quality

Robust Construction • Outdoor Rated • Weather Resistant

Included Components

- Parabolic Reflector
- Mounting Bracket
- LNB Support
