Overview

High-Performance E-Bike Power Solution

This 46.8V lithium battery pack is engineered specifically for electric bicycle applications, utilizing a robust 13S3P configuration. Encased in a durable, ABS fireproof shell, it is designed for safety and longevity in various operating conditions. The unit supports OEM/ODM customization, making it a flexible power solution for professional e-bike manufacturers.

Electrical Specifications

Nominal Voltage	46.8 V
Nominal Capacity	10.2 Ah
Factory Voltage	45.5 V
Configuration	13S3P

Physical Dimensions

Dimensions

345.5 mm
Length

103.73 mm
Width

71.76 mm
Height

Weight	2800 g
--------	--------

Operating Environment

Charging Temperature	0~45
Discharging Temperature	-20~60

Compliance & Quality

Quality Standards	UL, CE, ROHS, GB/T18287-2000
Housing Material	ABS Fireproof

Services

Customization	Yes
