

# 48-Cavity Bottle Preform Mold

High-precision 48-cavity mold designed for manufacturing bottle preforms. This mold is engineered for efficient production, ensuring consistent quality and dimensional accuracy for each preform.

## Overview

### High-Precision 48-Cavity Preform Mold

This high-precision 48-cavity mold is specifically engineered for the efficient manufacturing of bottle preforms. Designed to withstand the rigors of high-pressure injection molding, it ensures consistent quality and dimensional accuracy across every unit produced. Its robust construction offers the longevity and reliability required for high-volume PET bottle manufacturing environments.

## Technical Specifications

Cavity Count	48 cavities
Primary Application	PET bottle manufacturing
Industry Usage	Light Industry, Injection Molding, PET Packaging

## Key Features

### Performance Highlights

**48 units**

Cavity Capacity

**100 %**

High-Pressure Durability
