

4800W Gasoline Generator with LPG Option

This gasoline generator provides a rated output of 4800 watts at 220V and 50Hz. It can also deliver a peak output of 5500 watts for 10 seconds to start larger equipment.

Overview

Versatile Power Generation

This 4800W generator offers dual-fuel flexibility, supporting both gasoline and LPG operation for versatile power needs. Designed for reliability, it features a robust 389cc engine and a portable frame with an integrated wheel kit. With both AC and DC output capabilities, it provides a dependable power solution for various professional and industrial applications.
