Overview

Industrial-Grade Power Solution

This 48kW industrial generator is engineered for reliable, continuous power generation in demanding environments. Built with high-quality components including premium copper windings and specialized insulating materials, it ensures consistent performance and durability. Designed for industrial facilities and backup power applications, this unit features a robust construction and a comprehensive cooling system for extended service life.

Technical Specifications

Rated Power Output

48 kW

Rated Power

Max Test Capacity

1500 kW

Materials & Components

Material Specifications

Component	Specification/Origin
Copper	100% Copper
Steel Sheet	Industrial Grade
Insulating Varnish	German Standard
Insulating Paper	Austrian Standard
Bearing	Standard C&U (Options: SKF, NSK)

Service & Warranty

Warranty Period	2 Years
Warranty Policy	Free replacement unit provided for covered issues

Logistics & Quality

Packaging	Standard export plywooden case
Quality Standards	ISO Certified Materials, Extensively Tested, Industrial Grade
