

# 4.8V 250mAh Ni-MH Rechargeable Battery Pack

This rechargeable Nickel-Metal Hydride (Ni-MH) battery pack is designed for various electronic devices. Constructed from four 1/2AAA cells connected in series, it features a 4.8V nominal voltage and a 250mAh capacity.

## Product Overview

### Compact Power Solution

This rechargeable Nickel-Metal Hydride (Ni-MH) battery pack is engineered for devices requiring a compact and lightweight energy source. Featuring a 4.8V nominal voltage and 250mAh capacity, it is constructed from four 1/2AAA cells connected in series. This configuration provides a reliable power solution for various electronic applications where space is at a premium.

## Electrical Specifications

### Nominal Voltage

**4.8 V**

Voltage

### Capacity

**250 mAh**

Capacity

## Technical Details

Battery Chemistry	Ni-MH (Nickel-Metal Hydride)
Cell Configuration	4x 1/2AAA cells (Series)

## Safety & Compliance

### Safety Warnings

- Do not dispose of in fire
- Rechargeable battery pack
