

4.8V 550mAh Ni-MH Battery Pack

This rechargeable Nickel-Metal Hydride (Ni-MH) battery pack has a 4.8V nominal voltage and a 550mAh capacity. It is designed for various electronic applications requiring a compact and lightweight power solution.

Product Overview

Reliable Power Solution

This 4.8V 550mAh Nickel-Metal Hydride (Ni-MH) battery pack is engineered for versatility and consistent performance in electronic applications. Designed with a compact 4/5AAA cell configuration, it offers a lightweight power solution suitable for various portable devices. Its robust construction ensures reliable energy delivery, making it an ideal choice for equipment requiring stable voltage.

Technical Specifications

Chemistry

Ni-MH

Nominal Voltage

4.8 V

Rated Capacity

550 mAh

Cell Size

4/5AAA

Safety and Handling

Safety Instructions

- Do not dispose of in fire
