

4D55 Engine Starter Motor

This starter motor employs Argon ARC welding technology for stable rotor operation. The switch coil winding adheres strictly to OE parts standards, ensuring optimal performance.

Product Overview

High-Performance Engine Ignition

This starter motor is engineered specifically for 4D55 engines, providing consistent and rapid ignition performance. Built with a focus on durability and reliability, it serves as a critical component for engine starting systems. The unit meets precise technical specifications to ensure a direct fit and seamless operation for industrial and commercial applications.

Technical Specifications

| | |
|---------------|----------------|
| Rated Voltage | 12 V |
| Power Rating | 2 KW |
| Teeth Count | 10 |
| Rotation | Clockwise (CW) |

Compatibility

| | |
|----------------------|----------|
| OEM Reference Number | M2T56171 |
| Engine Compatibility | 4D55 |
