Overview

Professional 4G LTE Communication Solution

This 4G LTE Push-to-Talk radio is engineered for high-speed, reliable communication across wide areas. By leveraging 4G network technology, it offers reduced latency and faster data transfer rates compared to traditional methods. Designed for professional environments, it features a rugged build, long-lasting battery life, and advanced management capabilities like real-time location tracking.

Technical Specifications

Charging Methods

- USB
- Desktop Charger
- Car Charger

Battery Capacity	5200 mAh
Display Size	1.77 inch
Connectivity	4G LTE, Bluetooth

Features

Key Capabilities

Real-time Location Tracking • Talker Priority • Hands-free Operation • Full/Half Duplex

Performance Highlights

4 G
