

4G13S Engine Exhaust Manifold

This exhaust manifold is engineered for 4G13S engines. It optimizes exhaust flow, enhancing engine performance and efficiency.

Product Overview

High-Performance Exhaust Manifold

This high-performance exhaust manifold is precision-engineered for the 4G13S engine platform. Featuring a specialized tubular design, it is optimized to enhance exhaust flow, effectively reducing backpressure to unlock improved horsepower and torque. Constructed from durable materials, this component ensures long-lasting reliability and includes precision-engineered flanges for a secure, leak-free installation.

Technical Specifications

Design Features

- Tubular construction
- Optimized exhaust flow
- Precision-engineered flanges

Engine Compatibility

4G13S

Performance Benefits

Key Benefits

1 Improved

Backpressure Reduction

1 Optimized

Scavenging Efficiency
