

4JB1 Diesel Engine with Plunger Fuel Pump

This diesel engine reaches a maximum speed of 3000rpm. It delivers between 41kW and 45kW of power and features a plunger oil pump to ensure uniform cylinder lubrication and stable operation.

Product Overview

4JB1 Diesel Engine Overview

The 4JB1 diesel engine is a robust and reliable power source designed for demanding industrial and automotive applications. Featuring a four-cylinder configuration and a plunger fuel pump, this engine ensures uniform fuel delivery and stable operation. Its construction utilizes a durable cast iron cylinder block and an aluminum cylinder head, balancing strength with efficient heat dissipation for a long service life.

Performance Metrics

Maximum Engine Speed

3000 rpm
Max Speed

Engine Power Range	41kW - 45kW
--------------------	-------------

Technical Specifications

Fuel System	Plunger fuel pump with direct injection
-------------	---

Configuration	4-cylinder
---------------	------------

Construction & Materials

Key Materials	Cast Iron Cylinder Block, Aluminum Cylinder Head, Forged Steel Crankshaft
