

4K Ultra HD Ku-Band LNB

This Ku-Band LNB supports 4K Ultra HD signal reception. It has LO frequencies of 9.75/10.509 GHz.

Overview

High-Performance Satellite Reception

This 4K Ultra HD Ku-Band LNB is engineered for superior satellite signal reception, ensuring compatibility with DVB-S2 (HDTV) standards. It features advanced low-noise technology and high conversion gain to deliver crystal-clear imagery. Designed for reliability, the unit includes robust weather protection to maintain signal integrity in various environmental conditions.

Technical Specifications

Compatibility

4K Ultra HD • DVB-S2 • HDTV

LO Frequencies

9.75 GHz, 10.509 GHz

Features

Key Features

- Superior Phase Noise performance
- Low Noise Figure
- Higher Conversion Gain
- Excellent Cross Polarization Isolation
- Ultimate Reliability
- High quality weather protection
