

4kW Inverter Generator with 220V AC Output

This 4kW inverter generator delivers a reliable power source for diverse applications. It features a 220V AC output and a voltmeter display for monitoring performance.

Product Overview

Portable Power Solution

This 4kW inverter generator is designed to provide reliable, portable power for various professional and field applications. It features a robust frame construction and an intuitive control panel, making it suitable for demanding environments. Equipped with a 13-liter fuel tank and dual AC output capabilities, it ensures consistent operation while maintaining safety standards.

Performance

Power Output

3500 W

Rated Output

4000 W

Max Output

13 L

Fuel Tank Capacity

Technical Specifications

Electrical Parameters

Parameter	Value
AC Voltage	110/220V
Frequency	50/60Hz

Maintenance & Safety

Maintenance Schedule

- Change engine oil every 50 hours
- First oil change required at 25 hours
- Perform regular oil checks before operation
- Check for fuel leakage before starting

Safety Compliance

Outdoor Use Only, Carbon Monoxide Hazard, Read Manual Before Operation, Fuel Leakage Check Required
