Product Overview

The 4T crawler dumper features a robust crawler track system for superior traction and stability on various terrains.

Versatile 4T Crawler Dumper

This 4T hydraulic diesel crawler dumper is engineered for high-performance material handling in demanding environments. Featuring a robust crawler track system, it provides superior traction and low ground pressure, making it ideal for construction sites, gardening, road maintenance, mining, and waste treatment facilities. The unit is equipped with a heavy-duty hydraulic dumping mechanism, ensuring efficient loading and unloading operations.

Technical Specifications

The hydraulic system allows for precise control and operation of the dumper bed.

Load Capacity	4 T
Drive System	Hydraulic Diesel
Undercarriage	Rubber Tracks
Key Features	Hydraulic Dumping, Compact Design, High Traction, Low Ground Pressure

Applications

Designed for versatility, the crawler dumper excels in various industrial and outdoor applications.

Suitable Environments

- Construction Sites
- Gardens and Landscaping
- Golf Course Maintenance
- Waste Treatment Plants
- Road Maintenance
- Mining Operations

Quality & Maintenance

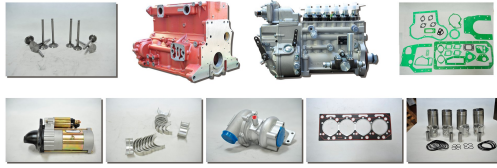

Rigorous quality control inspections ensure every unit meets specified performance standards.

Quality Compliance

ISO 9001:2015 • CE Certified • Quality Inspected

GENUINE PARTS

A wide range of genuine replacement parts is available to ensure long-term equipment reliability.

Available Replacement Parts

Component Category

Engine Valves & Block

Fuel Injection System

Starter Motor

Crankshaft Bearings

Turbocharger

Cylinder Head Gaskets

Pistons & Liners
