Product Overview

Versatile Semi-Rigid Ducting Solution

This 5-inch semi-rigid aluminum air ducting is engineered for high-performance ventilation and HVAC applications. Its flexible, corrugated design allows for easy shaping and installation in tight or complex spaces. Constructed from durable aluminum, this ducting offers excellent corrosion resistance, making it an ideal choice for both professional ventilation systems and specialized equipment like inflatable structures.

Technical Specifications

Corrugation Options

- 4 Corrugation
- 9 Corrugation

Duct Diameter

5 inch

Material Thickness

0.06 - 0.11 mm

Features and Applications

Recommended Applications

HVAC Systems • Inflatable Structures • Exhaust Fans • Air Conditioning

Available Colors

Silver, Black, Brown
