Product Overview

Central Locking Reliability

This 5-pin central door lock actuator is engineered specifically for compatibility with Peugeot vehicle locking systems. Designed for seamless integration, it enables efficient remote locking and unlocking functionality. The robust construction ensures reliable performance and durability, meeting essential standards for automotive door control components.

Technical Specifications

Pin Configuration	5
Component Type	Central Door Lock Actuator

Manufacturing & Supply

Auto Switch Production Capacity

3000000 pcs

Monthly Capacity

Auto Relay Production Capacity

1500000 pcs

Monthly Capacity

Custom Development	Drawing-based design, Sample-based development
--------------------	--

Packaging & Logistics

Packaging Specifications

Item	Detail
Individual Packaging	1pc/bubble bag in inner box
Carton Quantity	100pcs/ctn
