

5-Port 10/100Mbps Ethernet Switch

This 5-port 10/100Mbps Ethernet switch is designed for SOHO or workgroup users. The desk-top or wall-mounting design and internal power supply make it a robust networking solution.

Overview

Compact SOHO Networking Solution

The 5-Port 10/100Mbps Ethernet Switch is designed to provide a reliable and cost-effective networking solution for small office and home office environments. Featuring plug-and-play installation, it simplifies network expansion without the need for complex configurations. The device ensures seamless connectivity through its integrated auto-negotiation and auto-MDI/MDIX support, effectively eliminating the requirement for crossover cables.

Technical Specifications

Number of Ports	5
Data Transfer Rate	10/100 Mbps

Features

Design	Compact • SOHO Ready
Installation Method	Plug-and-Play, Auto-Negotiation, Auto-MDI/MDIX
