

5-Ton Automatic Coil Unwinder

The 5-ton automatic coil unwinder is a heavy-duty industrial machine designed for efficiently unwinding coils of metal. It features adjustable coil guides, tension control, and safety mechanisms for integration with production lines.

Product Overview

Industrial Automatic Uncoiler

This heavy-duty automatic uncoiler is engineered for high-efficiency material handling in demanding industrial environments. With a robust steel frame and a powered uncoiling mechanism, it reliably manages coils up to 5 tons. Designed for seamless integration, it supports consistent feeding for stamping, roll forming, and slitting production lines.

Technical Specifications

Operation

Automatic • Powered

Max Load Capacity

5 tons

Features

Key Features

- Adjustable coil guides
- Tension control system
- Robust steel frame construction
- Overload protection

Safety

Safety Mechanisms

Emergency Stop, Overload Protection

Application

Compatible Production Lines

- Stamping lines
- Roll forming lines
- Slitting lines
