Overview

5-Ton Diesel Forklift for Container Handling

This heavy-duty 5-ton diesel forklift is specifically engineered for efficient container handling and high-capacity material transport. Featuring a robust hydraulic system and a 4.5-meter lift height, it provides reliable power and stability for demanding industrial environments. The design prioritizes operator comfort and operational safety, incorporating advanced ergonomic features and intuitive controls to minimize fatigue during long shifts.

Performance

Operating Performance

5000 kg
Rated Capacity

4500 mm
Max Lifting Height

20 %
Gradeability

2850 mm
Turning Radius

Technical Specifications

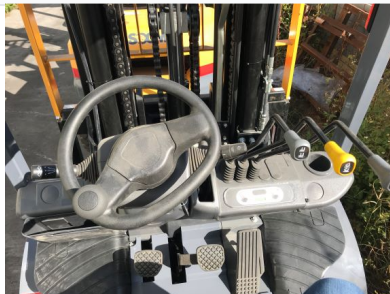

Technical Data

Feature	Specification
Power Unit	Diesel
Transmission	Electronic hydraulic
Load Center	500 mm
Tire Type	Pneumatic
Mast Tilting Angle	6/12 deg
Free Lifting Height	150 mm

Dimensions

- Overall Length (with fork): 4300 mm
- Overall Width: 1490 mm
- Overhead Guard Height: 2255 mm
- Fork Size: 1220 x 150 x 55 mm

Features

Maintenance

- Removable side cover for easy access
- Integrated control box for fuses and relays
- Aluminum heat sink for improved cooling
- Double muffler for noise reduction

Safety and Ergonomics

Suspension system, Adjustable seat, LCD instrument display, Neutral start safety, Double protection brake lever, Enhanced front view, Large step area
