Product Overview

High-Concentration Hydrogen Peroxide

This industrial-grade hydrogen peroxide is supplied at a 50% concentration, designed for demanding applications across various sectors. It is produced through advanced chemical processing, ensuring stability and reliability for large-scale operations. The solution serves as a critical chemical agent for industries requiring high-purity oxidation and bleaching capabilities.

Technical Specifications

Annual Production Capacity

10000 tons
Annual Output

Concentration	50 %
---------------	------

Applications

Market Reach

- Domestic market supply
- International export

Target Industries	Papermaking, Textile Industry, Medicine
-------------------	---
