

50 Lumen Stainless Steel Solar Garden Light

This solar light provides 50 lumens of illumination for gardens and pathways. Its stainless steel construction ensures durability and a modern look.

Product Overview

Efficient Solar Illumination

This stainless steel solar garden light is a durable and stylish solution for enhancing outdoor pathways, gardens, and patios. Designed for reliability, it features an amorphous solar panel that charges the internal battery during the day to provide automatic dusk-to-dawn illumination. With a warm white 50-lumen output and a robust weather-resistant construction, it offers a cost-effective, wire-free lighting experience.

Technical Specifications

Brightness

50 lm

Luminous Flux

Battery Voltage	3.2 V
Battery Chemistry	Li-ion
Working Duration	2 days (fully charged)
Light Source	1 x Super bright warm white LED

Physical Attributes

Housing Material	Stainless steel
Lens Material	Glass
Diameter	180 mm

Features

Key Features	Solar Powered, Amorphous Panel, On/Off Switch, Wire-free Installation
