

500-2000VA Line Interactive UPS with Long Delay

This line interactive UPS ensures reliable power backup with an extended delay. It supports applications requiring 500VA to 2000VA, featuring advanced power management and protection.

Overview

Reliable Power Protection

This line interactive UPS system offers a versatile power backup solution with a capacity range from 500VA to 2000VA. Designed to ensure stable and clean power output, it provides seamless transfer to battery power during outages, effectively preventing data loss and equipment damage. The unit features an intuitive front panel display for real-time monitoring of voltage, load, and battery status, making it an ideal choice for critical equipment protection.
