

# 500-2600 KW Diesel Generator Set

This diesel generator set is designed for heavy-duty power generation, providing outputs from 500KW to 2600KW. It is engineered with a durable construction, efficient cooling, and an advanced control panel for seamless operation.

## Overview

### High-Capacity Diesel Power Solutions

These professional-grade diesel generator sets are engineered for heavy-duty industrial and emergency power applications, offering a wide power range from 500KW to 2600KW. Equipped with advanced electronic management systems, they provide autonomous diagnostics, fault monitoring, and data recording capabilities to ensure operational reliability. Designed for versatility, the series supports diverse configurations including mobile, low-noise, and multi-parallel setups to meet specific site requirements.

## Performance

### Power Output Range

**500 KW**

Minimum Power

**2600 KW**

Maximum Power

## Technical Features

### Management System

MDEC electronic management, Self-test functions, Fault alarm indicator, Storage and recording

## Configuration Options

### Available Unit Types

- Common type
- Mobile power trailers
- Automation and remote control type
- Low-noise type
- Telemetry type
- Remote inquiry units
- Multi-parallel units
- Emergency power supply vehicle

## Support

### Service Commitment

Global support network • 24-hour problem resolution
