

500 LPM Fuel Dispenser

This heavy-duty fuel dispenser dispenses up to 500 liters per minute. It is constructed with stainless steel for durability and corrosion resistance.

Overview

High-Capacity Fuel Dispensing Solution

This heavy-duty fuel dispenser is engineered for high-volume refueling environments, offering a robust flow rate of 500 liters per minute. Constructed with high-grade stainless steel, it ensures exceptional durability and resistance to corrosion in demanding industrial or commercial settings. The unit incorporates a user-friendly digital interface designed for precise measurement and reliable control during operation.

Maximum Flow Rate

Construction & Design

Material	Stainless Steel
Durability Features	Corrosion Resistant, Heavy-Duty Construction

Operational Features

Suitable Applications

- Industrial refueling
- Commercial fleet fueling
- High-volume sites

Interface	Digital Display
