

500g Plumb Bob with String

This 500-gram plumb bob is designed for establishing a precise vertical reference line. It is constructed from solid metal with a pointed tip and includes a string for suspension.

Product Overview

Professional Vertical Alignment Tool

This 500g plumb bob is a precision instrument designed for establishing accurate vertical reference lines in construction, surveying, and carpentry. Crafted from a solid metal cone with a sharpened tip, it ensures reliable performance and longevity on the job site. The included string allows for immediate use, making it an essential tool for achieving perfect verticality in various professional applications.

Technical Specifications

Included Components

- Metal plumb bob
- Suspension string

Weight	500 g
Material	Solid Metal

Applications

Primary Applications	Construction, Surveying, Carpentry, Vertical Alignment
