

500G Straight Claw Hammer with Fiberglass Handle

This claw hammer is designed for driving nails into wood and other materials. It features a forged steel head with a claw for removing nails and a fiberglass handle for comfort and vibration reduction.

Product Overview

Professional 500G Straight Claw Hammer

This versatile 500g claw hammer is engineered for reliability in professional environments. Featuring a high-quality forged carbon steel head with specialized surface processing, it ensures superior durability and hardness. The ergonomic fiberglass handle is designed to minimize shock impact while providing a secure, comfortable grip for extended use.
