

# 500kg Capacity Hydraulic Transmission Jack

This 500kg hydraulic transmission jack is designed for removing, installing, and transporting transmissions and transaxles. It features a fully adjustable saddle with adjustable brackets and smooth-rolling swivel casters for easy maneuverability.

## ADDITIONAL IMAGES

## Product Overview

### Professional Transmission Jack

This 500kg hydraulic transmission jack is engineered for professional automotive environments, offering a stable and reliable solution for transmission and transaxle removal or installation. Built with heavy-duty steel, it features a wide base and swivel casters for excellent maneuverability around the workshop. Its foot-operated hydraulic system ensures hands-free, precise control during operation, enhancing safety and efficiency for mechanics.

## Performance & Capacity

### Maximum Load Capacity

**500 kg**  
Capacity

### Lifting Range

- Minimum Height: 1100mm
- Maximum Height: 1900mm

## Design & Construction

### Saddle Features

Fully Adjustable • Corner Brackets • Protective Rubber Pad

### Material

Heavy-duty steel

### Mobility Features

4 Rolling Casters, 360° Swivel Wheels, Double Handle

## Safety & Operation

### Safety Features

- Safety overload system
- Wide chassis for stability

### Control Mechanism

Foot-operated hydraulic pump with precision hand release valve
