Overview

Versatile Material Transport

This 500kg mini tracked dumper is designed for efficient bulk material handling in confined spaces and challenging terrains. Featuring a solid steel design with an adjustable hopper, it provides exceptional maneuverability through narrow pathways. Equipped with manual tilt functionality and a reliable gasoline engine, it serves as an ideal solution for construction, landscaping, and agricultural projects.

Technical Specifications

Operator controls including clutch, steering handle, and gear plate for precise maneuverability.

Load Capacity

500 kg
Load Capacity

Engine	LONCIN 6.5HP 196CC Gas
