

500mAh Lithium Polymer Pouch Cell Battery

This is a compact lithium polymer pouch cell battery with a 500mAh capacity. It is suitable for portable electronic devices needing a lightweight and efficient power source.

Product Overview

Compact Power Solution

This 500mAh lithium polymer pouch cell battery is designed for portable electronic devices that require a lightweight and efficient power source. Its compact form factor makes it an ideal choice for space-constrained designs in modern electronics. The cell is clearly marked for easy identification and integration into your product assembly.

Technical Specifications

Capacity

500 mAh
Capacity

Model Number	LI383440A
Battery Chemistry	Lithium Polymer (Li-Po)
Form Factor	Pouch Cell

Features

Key Attributes	Lightweight, Compact, Portable
----------------	--------------------------------
