

500W AC Motor 220V

This AC motor is designed for various industrial applications. Operating at 220V and 50Hz, it delivers 500W of power with a torque of 0.9N.m and a speed of 5000r/min.

Product Overview

High-Performance Industrial Motor

The 500W AC Motor (Model SF-7645/4A) is a robust and efficient solution engineered for demanding industrial applications. It delivers consistent performance with a nominal power of 500W and an impressive operational speed of 5000r/min. Built to operate reliably at 220V, this unit provides the essential torque and power density required for high-cycle industrial machinery.
