

500W Coaxial RF Load

Coaxial load designed for RF termination in network communication systems. Specifications include a power rating of 500W and a frequency range of DC-4GHz.

Product Overview

High-Performance Coaxial RF Load

This 500W Coaxial RF Load is engineered for demanding network communication applications requiring reliable termination. With a robust power handling capability of 500W, it ensures stable performance across a wide frequency range from DC to 4GHz. Designed for professional use, this component provides the precision and durability necessary for critical RF system testing and maintenance.

Technical Specifications

Power Rating

500 W

Rated Power

Frequency Range

DC - 4GHz

Primary Application

Network Communication, RF Testing, Signal Termination
