Product Overview

High-Performance 500W Lithium-Ion Charger

This 500W charger is designed for high-efficiency charging of lithium-ion batteries in electric motorcycles, scooters, and energy storage systems. It features a robust aluminum housing with integrated status indicators to provide real-time charging progress. With a wide range of output configurations and optional battery communication, it ensures optimal performance and longevity for professional LEV applications.

Technical Specifications

Voltage & Current Options

Voltage (V)	Current (A)
84.0V	5.0A
58.8V	8.0A
54.6V	8.0A
42.0V	10.0A
29.4V	15.0A
21.0V	20.0A
16.8V	20.0A

Input Voltage AC 110-240V 50/60HZ

Working Temperature 0~40

Physical Characteristics

Compact 500W charger featuring a plug-in design and status indicators for motorcycles and LEVs.

Dimensions	210 x 111 x 63mm
Weight	1500 g

Features

Key Features

- Aluminum housing with various color configurations
- Integrated charging status indication
- Optional battery communication for monitoring and management
- Plug-in design for ease of use

Applications

Suitable For	Electric Motorcycles, Electric Bicycles, Electric Scooters, Electric Tricycles, Energy Storage Systems, Industrial Vacuum Cleaners
