

50L/D Dehumidifier with Electronic Controls

This 50L/D dehumidifier is designed for continuous operation. It features electronic controls with an LED or LCD display, a 2-speed fan, auto defrost, and a front-removable 8L bucket with a bucket-full indicator lamp and removable air filter.

Product Overview

High-Efficiency Moisture Control

This 50L/D dehumidifier is engineered for continuous, high-performance operation in environments prone to dampness. Featuring intuitive electronic controls and a user-friendly design, it effectively combats mold and mildew while maintaining air quality. With its portable castor-wheel system and low-temperature functionality, it provides a versatile solution for basements, bathrooms, and other humidity-sensitive spaces.
