Product Overview

Industrial Oxygen Pressure Gauge

This high-performance 50mm pressure gauge is specifically designed for safe and accurate monitoring of oxygen pressure systems. Featuring a durable chrome-plated housing for enhanced corrosion resistance, it provides reliable readings up to 14 bar or 200 psi. Engineered without oil to ensure oxygen compatibility, this gauge is a robust solution for demanding industrial automation applications requiring precision and safety.

Performance Specifications

Key Performance Indicators

14 bar

Max Pressure

200 psi

Max Pressure

50 mm

Dial Diameter

Technical Details

Materials and Components

Component	Available Materials
Case	Chrome Plated, SS304, SS316, Black Steel, Plastic
Window	Glass, Tempered, Safety, PC, Acrylic
Movement	SS304, Brass
Bourdon Tube	SS316, Phosphor Bronze

Gauge Type

Liquid Filled • Dry Type • Oxygen Compatible

Connection Threads

- PT
- NPT
- G

Mounting Styles

Bottom, Back, Lower Back
