Product Overview

Sustainable Outdoor Illumination

This 50W LED Solar Garden Light provides a high-efficiency, cost-effective lighting solution for villas, resorts, parks, and large gardens. Designed for durability and ease of installation, it eliminates the need for external wiring by utilizing advanced solar energy conversion. The robust aluminum alloy construction ensures long-term performance in outdoor environments, while the integrated sensor technology allows for automatic, hassle-free operation.

Technical Specifications

Power Rating	50 W
Solar Panel Type	Monocrystalline
Body Material	Aluminum Alloy
Key Features	Solar Powered, Automatic Sensor, LED Chip Technology, Weather Resistant

Application

Ideal For

- Villas
- Resorts
- Gardens
- Public Parks
- Landscape Lighting
- Pathway Illumination
