

510 Series Single Reduction Axle

The 510 series single reduction axle is engineered for robust performance and durability. It features a high-strength housing and precision-machined gears for efficient power transfer.

Product Overview

510 Series Single Reduction Axle

The 510 series single reduction axle is engineered for robust performance and durability in demanding applications. Featuring a high-strength housing and precision-machined gears, this axle delivers efficient power transfer and reliable operation. Its optimized design minimizes weight while maximizing load capacity, making it an ideal choice for medium-duty trucks, buses, and specialty vehicles.

Technical Specifications

Key Features

- High-strength housing
- Precision-machined gears
- Heavy-duty bearings
- Versatile mounting configuration

Gear Configuration

Hypoid gear set

Suitable Applications

Medium-duty trucks, Buses, Specialty vehicles
