

# 51mm Universal Motorcycle Exhaust Silencer

This universal motorcycle exhaust silencer is designed with a 51mm diameter inlet for broad compatibility. It is constructed from 304 stainless steel and carbon fiber for durability and high-temperature resistance, suitable for engines 1000cc and above.

## ADDITIONAL IMAGES

## Product Overview

### Universal Performance Silencer

This universal motorcycle exhaust silencer is engineered for performance and durability, featuring a 51mm inlet diameter compatible with a wide range of motorcycles. Constructed from high-quality 304 stainless steel with a carbon fiber-style outer wrap, it offers excellent corrosion resistance and heat management. Designed to handle high-output engines, this silencer is an ideal upgrade for riders seeking improved exhaust flow and aesthetics.

## Technical Specifications

### Finish

Silver • Black

### Inlet Diameter

51 mm

### Construction Materials

304 Stainless Steel, Carbon Fiber Wrap

## Performance Capabilities

### Engine Compatibility

**1000 cc+**

Max Engine Capacity

### Thermal Tolerance

High-temperature resistant
