

52mm Planetary Gearbox Motor

This 52mm planetary gearbox motor provides high torque, long life, and lower noise. Its compact design allows for versatile installation in various applications.

Overview

High-Precision Motion Control

This 52mm planetary gearbox motor is engineered for applications demanding a compact footprint combined with high torque output. Featuring a robust planetary gear system, it ensures efficient power transmission and smooth, quiet operation. It is an ideal solution for robotics, industrial automation, and precision machinery requiring reliable motion control.

Technical Specifications

Available Rated Speeds

- 32
- 42
- 53

Available Gear Ratios

- 8.63K
- 15K
- 20K
- 22K
- 25K

Gearbox Diameter

52 mm

Certifications & Compliance

Certifications

CE • UL • CCC • TUV Rheinland
