

## 5.5 HP Gasoline Engine for Small Machinery

This 5.5 HP gasoline engine is designed for a variety of applications, providing reliable power for small machinery and equipment. It is a single-cylinder, air-cooled engine known for its compact size and ease of use.

### Overview

#### Reliable Power for Small Machinery

This 5.5 HP gasoline engine is engineered to provide consistent and dependable power for a wide range of small machinery and equipment applications. Featuring a compact, single-cylinder, air-cooled design, this unit is built for ease of use and efficient operation in various working environments. It is an ideal solution for operators needing a versatile, robust engine for their equipment.

### Technical Specifications

#### Power Output

**5.5 HP**

Horsepower

#### Fuel Type

Gasoline

#### Engine Type

Single-cylinder, air-cooled

### Application

#### Suitable Applications

- Small machinery
- Equipment power
- Chopper machines
