

5.5 HP Single-Cylinder Gasoline Engine

This 5.5 HP gasoline engine is designed for a variety of applications. It features robust construction and efficient combustion for reliable power output.

Overview

High-Performance Single-Cylinder Engine

This robust 5.5 HP single-cylinder gasoline engine is engineered for reliability and consistent power output in various small equipment applications. Featuring an efficient overhead valve (OHV) design, it delivers dependable mechanical energy suitable for generators, water pumps, and other machinery. Its compact construction and durable build ensure easy maintenance and long-lasting performance in demanding environments.
