

5.5 OHV 160cc Engine

This 5.5 OHV engine is designed for various applications. It features a compact design, overhead valve configuration for efficient performance and durable construction.

Product Overview

High-Performance 5.5 OHV Engine

This 5.5 OHV engine is engineered for versatility and reliable performance across various small equipment applications. Featuring an overhead valve (OHV) configuration, it offers improved efficiency and power delivery compared to standard designs. Its robust construction ensures long-term durability, making it an ideal choice for lawn mowers, generators, and other portable power equipment.

Technical Specifications

Power Rating

5.5 HP
Horsepower

Displacement	160 cc
Starting System	Recoil Start

Design Features

Valve Configuration
OHV

Common Applications	Lawn Mowers, Generators, Small Equipment
---------------------	--

Maintenance

Maintenance Profile	Designed for easy maintenance and serviceability
